EDUCATION

Carleton University

Ottawa, ON

Bachelor of Computer Mathematics

Sep. 2022 – Apr. 2026

- **Activities:** Carleton Student Engineering Society, Carleton Planetary Robotics Team, IEEE, Systems and Computer Engineering Society
- **Relevant Coursework:** Discrete Structures I & II, Data Structures and Algorithms, Linear Algebra

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, MySQL, Java, C, HTML/CSS

Frameworks: React, Node.js, Vue, Flask, Tkinter, Kubernetes

Developer Tools : Git, Docker, VS Code, Google Firebase, Jira, Microsoft Teams, PyCharm

Certifications: Microsoft Azure AI Engineer Associate, Microsoft Azure AI Fundamentals

EXPERIENCE

Software Engineer Intern

Sep 2024 – April 2024

dQuant Capital Management

Buffalo, NY

- Spearheaded the development of proprietary software using **Python** to automate a conceptual mathematical model from research papers, enabling large-scale simulations.
- Partnered with mathematicians and analysts to deploy the model using **NumPy**, executing **2 million** simulations daily, boosting analysis efficiency by **80%**.
- Utilized **Matplotlib** and **Tkinter** to develop a graphical user interface (GUI), enhancing data visualization and user interaction for end-users.
- Containerized and deployed the simulation engine in **Docker** containers orchestrated with **Kubernetes**, enabling parallel execution of market models across pods to accelerate financial data analysis.

PROJECTS

SwiftShare | *Python, Socket, Network Architecture*

- Developed a distributed Peer-to-peer (P2P) file-sharing system using the TCP/IP networking stack that allowed decentralized file transfer over **10+** nodes.
- Utilized multi-threading to handle **50+** concurrent file transfer requests with enhanced network efficiency and maintained high performance under load.
- Implemented dynamic peer management to allow nodes to join/leave the network within 2 seconds and maintain a list of **10+** peers using real-time broadcasting.
- Designed effective file chunking and reassembly, splitting large files into 512-byte chunks to be transferred optimally, ensuring **0%** loss in reassembly.

RetailVerse | *JavaScript, React, MySQL, Node.js*

- Developed a responsive full-stack POS web application using **React** for the front-end and **Node.js/Express** for the back-end, optimizing database queries to achieve a **25%** increase in transaction processing speed.
- Designed and managed a **SQL database** for efficient handling of transactions, product management, and administrative functions.
- Engineered a Firebase-based security module for robust user authentication and admin control, reducing unauthorized access incidents by **100%**.

ChatterBox | *JavaScript, React, Node.js, Firebase*

- Engineered a real-time chat application using **React** for the front-end and **Node.js** for back-end API services.
- Leveraged **Firebase** for sophisticated user authentication and live data handling, enabling real-time messaging and session management for **150+** active users without compromising performance.
- Crafted a responsive UI with React, enhancing user experience and interactivity across various devices and platforms.
- Executed unit and integration tests that prevented **10+** major issues from reaching production, ensuring seamless functionality and reliability.
